Model M48.FX

FASHION HEADPHONES

with built-in microphone

Using Your Headphones

Connect the headphone plug to the headphone jack of your music player. Be sure that the plug is fully inserted into the jack. If the plug is not fully inserted you may only hear sound from one side of the headphones.

To protect your hearing, always start listening with the Volume Control of your music player or game player set to a low level and gradually increase the volume to a comfortable listening level.

IMPORTANT! Listening at high volume for long periods of time can result in long-term hearing damage. For your safety, do not use headphones if they would prevent you from hearing warning sounds, such as while riding a bike, etc. Remember that noise isolation type headphones such as these are very effective in blocking outside noise, including warning sounds. Always be aware of your surroundings and do not use these headphones in situations that require you to hear warning sounds.

The two ear cups may be adjusted up or down for most comfortable fit.

In-Line Control with Microphone

Model M48 includes an in-line, one-button controller that allows you to answer and end phone calls 'hands-free'. You may also be able to record voice memos and control the music playback if your specific phone model provides for control of those features through the headphone jack.

Answer / End Calls

When an incoming call is received, briefly press the controller button once to answer the call, and speak into the microphone. To end the call, briefly press the controller button again.

Music Playback Control

If your phone or music player provides for this feature through its headphone jack, press the controller button once to begin playback and once again to pause playback. Press the controller button twice to skip to the next track, or three times to skip back to the previous track.

Voice Commands

If your phone or music player provides for this feature through its headphone jack, press and hold the controller button to activate your device's voice commands menu. Once your device has launched the voice command menu you may then speak your instructions into the microphone, accessing features such as hands-free messaging, navigation, voice memo recording, and more. For the specific commands and operations accessible through your device's headphone jack, please refer to the user manual of your device.
